

SODIQ OLUWATIMILEYIN

BUSINESS & DATA ANALYST

SQL • Power BI • Excel • Python • DAX • Business Intelligence • AI-Assisted Analytics
Lagos, Nigeria | sodiqoluwatimileyin190@gmail.com | 09128066639 | [Portfolio](#) | [Upwork](#)

PROFESSIONAL SUMMARY

Business & Data Analyst with a Business Administration background and hands-on experience turning business data and real-world operational observations into structured analytical systems, SQL analyses, Power BI dashboards, and decision-support insights. Skilled in SQL, Power BI, Excel, DAX, Python, data cleaning, transformation, relational data modeling, KPI development, customer analytics, sales analysis, and business intelligence. Built JRAD, an independent retail analytics ecosystem spanning data generation, validation, SQL analysis, and executive BI reporting. Uses prompt engineering and AI-assisted workflows to accelerate research, coding, analytical problem-solving, prototyping, documentation, and iterative solution development.

TECHNICAL SKILLS

Data & Analytics: SQL, MySQL, Power BI, DAX, Excel, Python, Data Cleaning, Data Transformation, Exploratory Data Analysis, Data Modeling, KPI Development, Business Intelligence

Programming & Web: Python, HTML, CSS, JavaScript, Basic Front-End Development

AI & Productivity: Prompt Engineering, Generative AI, AI-Assisted Research, AI-Assisted Coding, AI-Assisted Data Analysis, Workflow Optimization, Rapid Prototyping

Design & Prototyping: Figma, UI Prototyping, Visual Design

Business Analytics: Retail Analytics, Sales Analytics, Customer Analytics, E-commerce Analytics, Financial Analytics, Operational Analytics, Customer Retention

PROFESSIONAL EXPERIENCE

BEST REST HOTEL & SUITES | Store Manager | Jan 2020 – Dec 2020

- Managed day-to-day store operations, coordinating inventory, stock movement, product availability, record keeping, and routine business activities.
- Monitored stock levels and product movement to support efficient inventory management and minimize operational disruptions.
- Maintained and reviewed operational records to support purchasing, stock-control, and day-to-day business decisions.
- Coordinated staff activities and customer-facing operations while resolving routine operational issues and maintaining service standards.
- Developed firsthand exposure to customer behavior, inventory dynamics, sales activity, operational processes, and business decision-making, providing a practical foundation for subsequent data analytics work.

FLAGSHIP INDEPENDENT PROJECT

JRAD — REAL-WORLD RETAIL BUSINESS INTELLIGENCE SYSTEM | Chapter 1: Descriptive & Diagnostic Analytics
Conceptualized and engineered a synthetic retail analytics ecosystem from real-world observations of Nigerian superstore operations, translating customer behavior, purchasing patterns, pricing, seasonality, payment behavior, branch activity, and operational processes into explicit data rules.

- Designed and generated an interconnected retail dataset comprising 225,000+ receipts, 1.8M+ transaction lines, 525 SKUs, and five simulated branches using Python, probability distributions, behavioral rules, and Excel reference data.
- Built the SQL analytical foundation by validating transaction data and analyzing revenue, customer behavior, product performance, branch performance, payment patterns, and inventory risk.
- Developed an executive Power BI intelligence layer using star-schema modeling, DAX, time intelligence, and Deneb/Vega-Lite to translate transactional data into performance, demand, customer-value, and strategic insights.
- Integrated data generation, data-quality validation, SQL analysis, data modeling, and BI reporting into a repeatable end-to-end analytics workflow, using AI-assisted iteration to accelerate research, problem-solving, prototyping, and solution refinement.
- Established a scalable foundation for future JRAD chapters focused on predictive analytics and machine-learning applications.

SELECTED ANALYTICS PROJECTS

THERA BANK — PERSONAL LOAN CAMPAIGN ANALYTICS | Power BI • DAX • Excel

- Analyzed 5,000 customer records and a 9.6% personal-loan acceptance rate, segmenting customers by income, education, demographics, and banking relationships to identify higher-potential campaign segments.
- Developed interactive analytical views and KPIs to evaluate customer characteristics, loan acceptance patterns, and marketing opportunities.

OLIST — CUSTOMER & OPERATIONAL ANALYTICS | SQL • Power BI • DAX

- Analyzed Brazilian e-commerce data across sales, customer purchasing behavior, retention, churn, delivery, fulfillment, product categories, and regional performance.
- Applied a 90-day inactivity definition to identify customer churn patterns and translate retention findings into actionable business insights.

PROFESSIONAL TRAINING & APPLIED PROJECTS

BCT ACADEMY | Data Analytics Training & Applied Projects | Certificate issued: 31 Mar 2026

- Completed practical data analytics training with project-based analysis, data preparation, visualization, insight generation, and presentation of findings.

TECHCRUSH | Data Analytics Training & Applied Projects | Completed: 18 Jun 2026 | Certificate issued: 25 Jun 2026

- Completed hands-on analytics training and an applied project, translating analytical findings into business-relevant insights and presenting project outcomes.

EDUCATION

FEDERAL UNIVERSITY OYE EKITI (FUOYE) — B.Sc. Business Administration | 2025–2026

FEDERAL POLYTECHNIC ILARO — HND & ND, Business Administration & Management | 2017–2022
